

### Supplies:

- St. Erasmus coloring page
- Globe and name plate template
- Colored pencils or crayons
- Clear plastic dessert plate (6")
- Glue stick
- Yellow and blue puffy paint (or window cling gel pens)
- Clear tape

### Instructions:

1. Color the St. Erasmus, the ship and waves, and the base of the globe template.
2. Cut out St. Erasmus and the ship in a close outline (it doesn't have to be perfect)
3. Write "St. Erasmus, Pray for Us." On the name plate.
4. Cut out the globe template and name plate from the globe template sheet.
5. Glue the ship and St. Erasmus to the globe template. Hint: Leave room on the bow of the ship to glue St. Erasmus into the ship.
6. On the clear plastic plate, make lightning and raindrops on the face of the plate using the yellow and blue puffy paint (or gel pens).
7. Allow the paint to dry for a couple minutes then flip the plate over on top of the globe. Hint: the paint can continue to dry after the project is complete.
8. Tape the plate to the globe.
9. Tape or glue the name plate to the base of your storm globe.
