

ST. PHILIP NERI

"First, let a little love find entrance into their hearts, and the rest will follow."

FEAST DAY MAY 26

St. Philip Neri lived in the mountains for most of his life. He wasn't totally reclusive though. At night, he walked to Rome and prayed by St. Sebastian's tomb. On one of those nights, something strange happened. A ball of light appeared and went into Philip's mouth. He swallowed the light and immediately had an overwhelming feeling of warmth, love and energy in his heart. The intensity came and went, but the warm feeling was always present.

Soon after this experience, Philip became a priest and started teaching children about God. People would often say there was a physical warmth about Philip and that sometimes it looked like his face was radiating with light.

After Philip died, his body was examined. Scientists found that his heart was four times the size of a normal heart!

Pray through the intercession of St. Philip Neri that we may radiate Christ.
